Professional Summary

Resourceful Cybersecurity Specialist and IT Project Manager with 9+ years of progressive experience securing enterprise networks, cloud infrastructure, and IT systems across telecommunications and financial services sectors. Demonstrated expertise in vulnerability assessment and penetration testing (VAPT), security operations, incident response, information security and compliance with ISO/IEC 27001, PCI DSS, and NIST frameworks. Skilled in implementing DevSecOps practices, CI/CD pipeline security, and Infrastructure as Code (IaC) using Terraform and Ansible. Holds multiple industry-recognized certifications including ISC2 CC, CCSP, CCNA, PMP, Splunk Security, EC-Council, OPSWAT ICIP, CISA, AVIATRIX Multi-Cloud and AWS credentials. Adept at leading cross-functional teams, managing security risk, and delivering resilient, audit-ready infrastructure on time and within budget.

Core Competencies

- Cybersecurity Operations & SIEM
- Vulnerability Assessment & Penetration Testing
- Incident Detection & Response
- Cloud Security (AWS IAM, VPC, Security Groups)
- Security Compliance (ISO/IEC 27001, ISO/IEC 27032, ISO/IEC 31000, PCI DSS, NIST)
- DevSecOps & CI/CD Pipeline Security
- Infrastructure as Code (Terraform, Ansible)
- Containerization Security (Docker, Kubernetes)
- Network Security (LAN/WAN, VPN, MPLS, Firewall)
- IT Project Management (PMP, CPMP)
- Risk Assessment & Threat Analysis
- Security Awareness & Team Leadership
- Monitoring & Operations: AWS CloudWatch, Config, CloudTrail, Splunk, Wireshark
- Virtualization & Systems: VMware, VirtualBox, Windows/Linux Server Administration

Professional Experience

Sentient Network Limited – Lagos, Nigeria

Cybersecurity & IT Project Manager | Mar 2025 – Mar 2026

- Managed end-to-end enterprise cybersecurity controls and data protection strategies, ensuring compliance with ISO/IEC 27001, PCI DSS, and NIST frameworks while minimizing operational and information security risks.
- Conducted comprehensive Vulnerability Assessments and Penetration Testing (VAPT), identifying critical security gaps and implementing remediation measures to strengthen overall security posture.
- Designed and deployed CI/CD pipeline security controls using Jenkins and GitHub Actions, integrating automated security scanning and compliance checks into the software delivery lifecycle.
- Implemented Infrastructure as Code (IaC) using Terraform and Ansible, enabling repeatable, auditable, and consistent deployments across multiple environments with built-in security baselines.
- Deployed and managed containerized security workloads using Docker and Kubernetes, optimizing scalability while enforcing container security policies and access controls.
- Led core network project delivery with 100% SLA compliance, maintaining 98% system availability across enterprise infrastructure through proactive monitoring and rapid incident response.
- Developed detailed weekly operational and performance reports, identifying infrastructure gaps and driving remediation initiatives to optimize service availability and security posture.

- Collaborated with Operations, Risk, and Finance teams to assess operational risks and implement mitigation strategies aligned with business continuity objectives.

Tizeti Network Limited – Lagos, Nigeria

Network Operations Center Engineer & Cybersecurity Specialist | Oct 2018 – Mar 2025

- Proactively monitored enterprise network environments to detect vulnerabilities and security threats, strengthening infrastructure protection and maintaining 99.9% service availability across client environments.
- Performed continuous risk assessments on critical infrastructure assets, identifying security weaknesses and implementing countermeasures in compliance with ISO and PCI DSS standards.
- Led resolution of critical network and security incidents, reducing mean time to resolution (MTTR) and ensuring uninterrupted business operations for enterprise clients.
- Delivered security awareness training programs to staff across the organization, promoting cybersecurity best practices and strengthening organizational security culture.
- Engineered and deployed PTP/PTMP wireless network solutions, configuring and optimizing routers, switches, and wireless access points to improve network performance and connectivity reliability.
- Developed comprehensive daily, weekly, and monthly network performance and security incident reports, enabling proactive threat detection and data-driven operational decisions.
- Collaborated cross-functionally with engineering, technical support, upstream providers, and vendors on incident escalation, fault resolution, and network performance optimization.

Mastercard - Forge Cybersecurity Program

Cybersecurity Analyst (Virtual Internship) | Sept 2024

- Functioned as a Security Analyst within Mastercard's cybersecurity simulation, applying risk assessment methodologies, threat analysis, and incident reporting to protect organizational assets.
- Performed continuous monitoring and analysis of phishing campaigns and social engineering threats, enabling timely detection and risk mitigation aligned with enterprise security standards.
- Developed targeted security awareness programs and policies to address cybersecurity training gaps and enhance organizational cyber resilience and compliance readiness.

Hagital Consulting, Lagos, Nigeria

Cybersecurity Internship (remote) | Jun 2024 – Dec 2024

- Conducted network, workstation, server, API, and mobile application penetration testing against corporate internet-facing and internal systems to find vulnerabilities thereby reducing the attack surface.
- Conducted risk assessment on critical assets to identify, analyze, and evaluate potential operational risk with effective risk treatment recommendations.
- Conducted Vulnerability Assessment and Penetration Testing (VAPT) to identify contextual risk severity and follow up on remediation of vulnerabilities discovered by external vendors.
- Used of Policies and frameworks (ISO 27001, GDPR, HIPAA, PCI DSS) to safeguard the security within a network and business operations.
- Conducted a Vulnerability assessment on systems, applications, and networks using SIEM tools, Linux, Splunk, Pentest, Hostedscan, Nmap, and Wireshark to scan vulnerabilities with vulnerability reports and provide recommendations for patching.

First City Monument Bank (FCMB), 17a Tinubu Street, Lagos

IT Support Officer (Internship) | Nov 2016 - May 2017

- Supported deployment, configuration, and maintenance of Asterisk IP PBX infrastructure across 250+ branch locations, ensuring high availability of enterprise communication systems.
- Conducted remote monitoring of UPS systems and power equipment across branch locations via secure VPN connectivity, improving infrastructure reliability and reducing downtime.
- Performed preventive maintenance of critical IT infrastructure and maintained accurate daily operational reports for management review.

Projects Success Highlights

- Implemented AI-enhanced cybersecurity workflow automation using n8n and Docker, improving threat detection and response efficiency.
- Increased network infrastructure uptime from 78% to 96% through systematic optimization and reliability improvement initiatives, directly enhancing client service delivery.
- Deployed Mikrowizard and Nagios network monitoring platforms on Proxmox virtualized infrastructure, significantly reducing cost of operations while enhancing real-time fault management.
- Managed large-scale WAN/MPLS and VPN network deployments for leading Nigerian financial institutions, improving branch connectivity, security, and operational efficiency.
- Designed and implemented a cross-platform LAN/WLAN Scanner application using Python, automating network perimeter scanning and device discovery across Windows, macOS, and Linux.
- Deployed a Jenkins CI/CD server on AWS using Terraform and Ansible, establishing automated, audit-ready infrastructure deployment pipelines compliant with DevSecOps standards.

Education

Higher National Diploma (ND & HND), Electrical/Electronic Engineering Technology – Distinction (2016)
Lagos State University of Science and Technology (formerly LASPOTECH), Lagos, Nigeria

Professional Certifications

Cybersecurity:	ISC2 Certified in Cybersecurity (CC) ISC2 CCSP Splunk Security Analyst EC-Council Ethical Hacking Essentials ISO/IEC 27001 Lead Implementer ISO/IEC 27032 ISO 31000 OPSWAT ICIP CISA Cybersecurity Risk
Cloud & DevOps:	Aviatrix ACE-MultiCloud Network Associate AWS Cloud Infrastructure Solutions (CSN) AWS Cloud Computing (CompTIA)
Networking:	Cisco CCNA MikroTik MTCNA Huawei HCIA Fortinet NSE 1 & 2 Aviatrix Multicloud Certified
Project Management:	Chartered PMP (CIPM/PMI) CPMP HSE Levels 1–3 (CIEHS)

Technical Skills

Security Tools:	Splunk (SIEM), Nessus, Qualys, Acunetix, HostedScan, Wireshark, Nmap, Burp Suite concepts
Cloud Security:	AWS IAM, VPC Security Groups, CloudTrail, CloudWatch, S3 Bucket Policies, Security Hub
Cloud Platforms:	AWS
DevSecOps & IaC:	Terraform, Ansible, Jenkins, GitHub Actions, GitLab CI/CD, AWS CodePipeline, ArgoCD
Containerization:	Docker, Kubernetes, Amazon ECS/EKS – container security and orchestration
Scripting & Automation:	Python, Bash, n8n Workflow Automation, Infrastructure as Code (IaC)
Networking:	Cisco, MikroTik, Ubiquiti, Cambium, LAN/WAN, MPLS, VPN, PTP/PTMP Wireless, Firewall
Monitoring & Ops:	Nagios, UNMS, LibreNMS, cnMaestro, CloudWatch, Splunk, Wireshark, Proxmox, Qualys
OS & Virtualization:	Linux (Ubuntu/CentOS), Windows Server, VMware, VirtualBox, Proxmox, Kali Linux.
Productivity:	Microsoft 365, Google Workspace, Slack, Jira. Microsoft Office.
